

# ***C&L America Inc.***

## ***Food Packaging Division***

**About your packaging....**

**If you're not thinking internationally,**

**you're not thinking.**

***C&L America Inc.***

**FOOD PACKAGING DIVISION**

# C&L America Inc.

## ***Food Packaging Division***

***Congratulations!!*** Choosing your packaging from **C&L America Inc.** has put you on the cutting edge of packaging technology, and way ahead of the curve on the quality, consistency, and economy your customers expect.

We are ***the*** premier offshore manufacturer of precision thermoformed packaging products to the food, electronic, and medical industry. Let's look at some of the advantages you'll enjoy when working with **C&L America Inc.** over all others.

### ***American quality, Offshore Savings***

We are American thermoformers, with over 15 years experience producing for, and servicing the American market. To deal with the economic realities of the cost of domestic production vs. offshore competition, we have acquired offshore capability with the goal of being able to offer our customers the same quality, delivery, and reliability as domestic production, but with the cost advantage of offshore pricing. Our many years of servicing the packaging needs of **Fortune 500** food manufacturers, means we know the importance of a reliable flow of quality product. We've used that experience to develop an offshore supply system to actually outperform domestic suppliers.

### ***How do we do it?***

Our production is based in Taiwan, the most industrialized, stable, and technically advanced offshore nation in Asia. Production facilities and infrastructure are state of the art, and in many areas exceed domestic technology. Taiwan shipping volume to the United States is huge, with shipments leaving out of several harbors daily. Shipping via boat has become like shipping by truck. Average time from our dock to yours is 15 days. Our average lead time from order placement to your dock is typically 30 days or less.

### ***What we produce....***

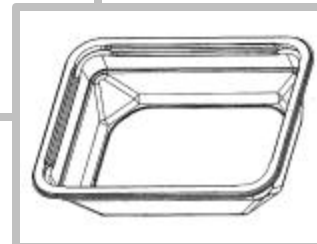

We produce thermoformed products primarily in APET, Polypropylene, Styrene, PVC, multilayer barrier, and clear OPS. All our materials are USDA food contact approved. All items are polybag sealed, and all cartoning is U.S. burst strength specification material. Shallow or deep draw containers, light or heavy gauge material, we will duplicate your current container with our in-house design team, or make something entirely new based on your specific needs.

### ***What's it like buying offshore from C&L America?***

We've set up our system to be exactly like buying from domestic suppliers, only better. Our sales, service, billing and shipping operations, as well as our design and technical services are all handled from our local offices in Naperville, Illinois. You can issue long term blanket orders, or purchase one shipment at a time, whatever fits your purchasing needs.

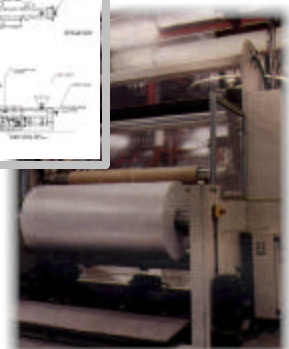

We can start by taking your current package, and after determining your volume needs, we quote you prototyping and finished tooling costs (if applicable), and a delivered per-piece price to your dock.

Or, tell us the size, color and performance requirements of your new package. With our in-house advanced design and tooling capabilities, our engineers will develop your project and produce prototypes typically within several weeks.

Once prototypes are approved, you issue your purchase orders to our local sales department, and within stated lead times your shipment will arrive by truck, on time and on spec.

## ***C&L America Inc.®      Micro-Containers***

**Microwaveable containers can be either heat sealed or lidded. We can supply everything from the container, up to a completely automated packaging line. All containers are packed separately from their tops for either distribution or food processor usage. All items can be ordered in full 20 or 40 foot container loads. Up to 3 different items can be combined per container. Call our sales department at 630-717-5400 for pricing and lead times.**

	CLYP-106 Tray and lid	Tray 8.5" x 3.5" x .7" high Lid 8.78" x 3.7" x 1.3" high	Styrene OPS
	CLCF-091 Tray and lid	Tray 9.25" x 5.6" x .78" high Lid 9.45" x 5.8" x .95" high	Styrene OPS
	CLFV-01 Tray and lid	Tray 8" x 2.95" x .8" high Lid 8.2" x 3.1" x 1.4" high	Styrene OPS

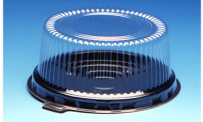

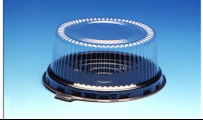

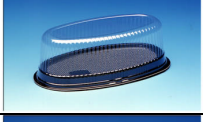

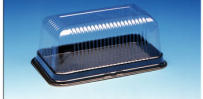

## **Thermoforming Division**

715 Delasalle Ct..  
Naperville, IL 60565  
**630-717-5400**

**FoodPak**© bakery trays are produced with crystal clear and black virgin polystyrene materials, USDA approved for food contact. This material gives **FoodPak**© containers their outstanding rigidity, light weight, low cost, and sparkling clarity. Custom designed ribbing in both the lid and base provides maximum rigidity, and a tight tamper resistant seal when closed, providing ultra protection for your product.

The advantages of the **FoodPak**© cakedome is it's state of the art design for secure snap closure, gentle ribs for unsurpassed strength, and the advanced bottom grid design which is optimized for rigidity to prevent accidental pop-opens. Don't see what you need? We'll design and make a custom container to your specifications in a matter of weeks, and with us it costs less than you think!

	Tray Model #	Size of tray	Material
	CL-0008	10.6" dia. X 4.2" high	OPS top, PS bottom
	CL-0006	7.65" dia. x 3.15" high	OPS top, PS bottom
	CL-1003	9.6" x 5.25" x 3" high	OPS top, PS bottom
	CL-5003	9" x 5.4" x 3.65" high	OPS top, PS bottom
